Patents

Sectors

Electronics - IT/software - Mechanical/engineering - Medical Devices - Nanotechnology
- Optical technologies - Telecommunications

Practice Groups

Computers & Electronics - Engineering & Design - New Ventures

Claire graduated from the University of Cambridge with an honours degree in Natural Sciences. Her studies included modules in Biochemistry, Pharmacology, Physics and Neuroscience. Following her graduation she worked as a research assistant at the University of Cambridge for a year before joining the firm as a technical assistant in 2003.

As a result of her extensive experience with computers and networking Claire works primarily in the fields of electronics, software and communication technologies. In addition to this she also has experience in the field of mechanical engineering.

At present, Claire is working towards completing a further formal qualification in Engineering, including modules in mechanical engineering, nano-technology, digital communications and fluid mechanics.
